“*The Shift Network does a masterful job in creating a virtual learning environment and community that supports the teaching. This was by far the best virtual learning program I have attended. I thought the design of the program was brilliant, starting with deep inner work through the various facets of the Enneagram, followed by the modules on methodologies, different applications practitioners have created, and the marriage of spirituality and science, grounding typology in neurobiology... Although I have studied the Enneagram for many years, this immersion program allowed me to finally know what living in Presence truly means.*

“ *The shifts have been transformational. Both my personal and professional lives have altered. As someone who is a dominant “Social Eight,” I tended to neglect not only myself but also my family. I have now created balance and harmony after seeing how my Self Preservation was neglected. I am also more available for my family. On the professional side, I am increasing tapping into other qualities which enable me to be of service by providing coaching sessions and creating spaces for women executives to activate their own power, with ease and grace. As a Senior United Nations Official and someone who has led large scale humanitarian operations, I have experienced that I can be of service by creating safe spaces for other leaders to emerge.*

Why Shift?

The Shift Network's reputation for **delivering high-quality online education ensures accessibility to individuals worldwide**. The flexible learning format allows students to balance studies with existing commitments, making it an ideal choice for those with busy schedules. Plus, the program offers ongoing support and resources after completion to nurture your lifelong journey of learning and growth.

Why Now?

On a global scale, it's apparent that the world is in need of a collective leap in consciousness. It's clear that the "solutions" we're using to address national and global problems aren't working. To create significant and sustainable change — to help us get through our collective traumas — we have to move into the cave of our own wounds and do the necessary repair work.

G.I. Gurdjieff, the man who brought the Enneagram symbol to the West, stated that its wisdom appears in the world in such times when a leap in spiritual consciousness is required, and when help to make this leap is available.

Has there ever before been a more urgent time for this work?

This leading-edge, year-long online video program will provide the Enneagram language, wisdom, guidance, and presence that's necessary to support the real innovation we need in our world today.
